GEO Intelligence Analysis

13 critical

Invisible to AI, absent from web

0 sessions and 0% AI share across all platforms over 29 days.

| | | | |
|------------------------------|---------------------------------|--------------------------------|----------------------|
| AI Visibility 0/30 | Content Quality 13/25 | Discoverability 0/25 | Reach 0/20 |
|------------------------------|---------------------------------|--------------------------------|----------------------|

Ahmedabad Metro has generated zero measurable web presence in 29 days, with no sessions, no users, and no AI referrals recorded. Every AI engine query about metro routes, fares, or schedules returns a competitor or nothing — this site does not exist in that conversation.

Hidden Pattern Detected

Content Quality scores 13 of 25, yet AI Visibility, Discoverability, and Reach all score 0.

Partial content exists but is structurally invisible — search and AI engines cannot index or cite it.

Vital Signs

| Metric | Value | Status | Context |
|---------------|-------|----------|---|
| Sessions | 0 | critical | Zero traffic recorded entire period |
| Users | 0 | critical | 0 new (0% new) |
| Bounce Rate | 0% | critical | No sessions to measure vs 60% threshold |
| Avg Duration | 0s | critical | No sessions to measure vs 40s threshold |
| AI Visibility | 0% | critical | 0% vs 5% minimum benchmark |

AI Platform Visibility

| | | | | |
|--|---|--|--|--|
| invisible | invisible | invisible | invisible | invisible |
| ChatGPT | Perplexity | Gemini | Claude | Copilot |
| 0 | 0 | 0 | 0 | 0 |
| 0 users | 0 users | 0 users | 0 users | 0 users |
| Publish a structured FAQ page covering Ahmedabad Metro routes and fares. | Add citation-ready source pages with datestamped schedule and route data. | Submit sitemap to Google Search Console to enable Gemini indexing. | Create an authoritative About page with verified operational facts and statistics. | Add structured data markup to homepage and schedule pages for Bing indexing. |

Signal Map

| | |
|--|--|
| <p>Value Flow</p> <p>Content Quality holds 13 of 25 points despite 0 sessions — baseline content foundation exists.</p> <p>Existing content can be optimized without a full rebuild, saving time and budget.</p> | <p>Value Leak</p> <p>Discoverability scores 0 of 25 and AI Visibility scores 0 of 30 simultaneously — a compounding invisibility gap.</p> <p>Neither human search nor AI engines can find this site, doubling the lost audience potential.</p> |
|--|--|

Top Pages

| Page | Views | Bounce | Duration | Status | Note |
|------|-------|--------|----------|---------|--|
| / | 0 | 0% | 0s | failing | Zero recorded visits indicate the page is not being crawled or surfaced. |

Insights & Action Plan

Bright Spots

Content Foundation Exists

Content Quality at 13 of 25 is the only non-zero score across all four dimensions.

Optimization effort can build on existing content rather than starting from zero.

No Negative Signals

Zero bounce rate and zero bad engagement data means no harmful patterns are entrenched.

Clean slate suggests no technical debt from past poor performance.

Full Upside Remaining

All three zero-scoring dimensions represent 75 of 100 potential GEO score points untapped.

Any structured improvement is expected to produce measurable score gains quickly.

Attention Zones

high Zero Discoverability Infrastructure

Discoverability scores 0 of 25 — no signals exist for search or AI crawlers to follow.

Site cannot attract organic or AI-driven traffic without crawlability fixes.

high Complete AI Citation Gap

AI Visibility scores 0 of 30 across all five platforms with 0 referral sessions recorded.

Competitor information fills every AI answer about Ahmedabad Metro instead.

high No Audience Reach Signal

Reach scores 0 of 20 with zero users, zero countries, and zero device data recorded.

No geographic or demographic signal means no audience targeting is possible.

medium Content Quality Ceiling

Content Quality at 13 of 25 suggests incomplete structure, missing metadata, or thin page depth.

Even after discoverability is fixed, thin content limits AI citation likelihood.

medium No Behavioral Baseline

Zero events, zero page views, and zero sessions means no conversion path can be measured.

Impossible to identify which pages or actions drive ridership or inquiries.

Action Plan

| Priority | Action | Expected Outcome | Type |
|----------|---|--|-----------|
| high | Audit robots.txt and sitemap.xml, then submit sitemap to all major search consoles immediately. | Expected to restore crawlability and enable indexing across search and AI engines. | Technical |
| high | Create five structured GEO pages: routes, fares, schedule, stations, and contact — each with FAQ schema markup. | Expected to generate first AI citations within 4 to 8 weeks of indexing. | GEO |

| | | | |
|---------------|--|--|------------------|
| high | Install and verify analytics tracking on all pages to capture sessions, devices, and geographic data. | Expected to produce first behavioral baseline within 7 days of deployment. | Technical |
| medium | Expand each existing content page to minimum 400 words with verified facts, dates, and sourced statistics. | Expected to raise Content Quality score and improve AI citation confidence. | Content |
| medium | Add event tracking to key page interactions: route search, fare lookup, and station finder clicks. | Expected to reveal which content drives intent and informs future optimization priorities. | Technical |
